Allowable Subject Matter

1. Claims 1-27 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Applicants have amended the claims in compliance with the office action dated 09/21/04. Upon further consideration and comparison with prior art of record, claims 1-27 are allowed. Particularly, the present relates to method and apparatus for sending side channel data over a high-speed digital communication link. Conventionally, system with transmission minimized differential signaling (TMDS) encoding send the same data enable (DE) for all three channels, creating redundancy. The present invention send an unaltered DE signal on one channel and an altered DE signal on the other channels to allow transmission of side channel data. Prior art of record, taken individually or collectively, fails to fairly teach such method and apparatus, as claimed, in all independent claims 1, 11, 15-18, 21, 22, 26, 27 (claims 2-10, 12-14, 19-20, 23-25 depend therefrom). Thus, claims 1-27 are found to be novel and unobvious over prior art of record.
